# Digital Vacuum Drying Ovens

**AccuTemp** series vacuum ovens are the #1 award-winning brand in vacuum systems. They greatly minimize the drying time for various materials, all while providing excellent temperature uniformity inside the chamber. A vacuum environment will also lower the boiling point for liquids, which is great for heat sensitive material processing. The spacious 3.2, 7.5, and 16 cu ft **AccuTemp** vacuum ovens feature our internal shelf heating technology. Each of these built-in shelves has its own heating, in-shelf temperature sensor, and PID controller. With our low proportional controllers, the result is perfect temperature uniformity, accuracy, and ultra-fast heating rates.

#### **Features**

- Third generation PID controller with built-in temperature calibration.
- Adjustable gas backfill capability with needle valve and vent port, perfect for creating inert gas environments or reintroducing air back into the chamber at a controlled rate.
- Aluminum shelving for the best thermal conductivity.
- Consistent, stable temperature accuracy of ± 1°F.
- Large, dual layer observation window with ½" tempered safety glass.
- 3" thermal insulation, preventing heat loss from the chamber.
- A built-in vacuum check valve prevents vacuum oil backflow.
- Easy to clean stainless steel interior with exceptional durability.
- Best in class 2-year warranty.
- CE certified. UL/CSA certification available.
