

DGT Series Digital Eyepiece Cameras

DGT Graphics Microscope Camera comes with the innovative technology. The USB2.0 frame rate is greatly improved whilst maintaining the fidelity of the original image output. Simple and economical microscopy imaging. DGT Graphics Microscope Camera brings high-speed experience. At the same time, the DGT also guarantees high-quality image output, 5 MP, 12 MP uncompressed resolution output, and integrates perfect color reproduction algorithm to bring super economic microscopy imaging and a high performance experience. Compatible operating systems for software: Windows 7/8/10 , Mac

Specification:

Model	DGT5	DGT12
Sensor Type	CMOS	CMOS
Sensor Size	1/2.8"	1/2.33"
Resolution	5MP, 2560(H)x1920(V)	12MP, 4000x3000
Pixel Size	2.0μm x 2.0μm	1.335μm x 1.335μm
Picture Format	TIFF/JPG/PNG/DICOM	TIFF/JPG/PNG/DICOM
Operating System	Windows 7/8/10 , Mac	Windows 7/8/10 , Mac
Data Interface	USB2.0	USB2.0

DGT5/DGT12
