

Laboratory accuracy in the field

Measure concentrations in brix, salinity, and a wide variety of other parameters. As small, light and simple to use as optical refractometers, but with the precision of a digital readout. Reads samples as small as 1 ml. Sample temperature is initially displayed on the large LCD, followed by the measurement results. The sophisticated microprocessor provides automatic calibration, automatic temperature compensation, and automatic shutoff (after 3 minutes). A sturdy water-resistant case protects the electronics from wet environments, and makes for easy clean ups. All models feature one-button calibration to distilled water, and indicate when the battery should be replaced (8000 readings). Comes ready to use with distilled water, transfer pipet, AAA battery, instructions and a carrying case.

DIM: 4⁵/₈" × 2³/₈" × 1¹/₄" (118 × 62 × 32 mm). WEIGHT: 4.6 oz (130 g).
