## INFINITY OPTIC SYSTEM

A new generation of microscopes feature Walter infinity high contrast Plan Achromatic DIN optics. The standard Köhler illumination system provides uniformly bright and free-from-glare specimen illumination, which optimizes a high image quality with brighter and sharper resolutions for micrography. The compact body is designed for flexibility, which can perform various applications such as brightfield, darkfield, and polarization. Trinocular microscope can be equipped with digital camera and Retina screen for photo and video documentation and image analysis.
