

STEREO MICROSCOPES

QF Series Stereo Microscope

Durable precision stereo microscope for the lowest prices!

Features:

- 45° inclined eyetubes with interpupillary adjustment from 55mm to 75mm
- 10x Wide-Field eyepiece
- Working Distance: 80mm
- Includes two 75mm stage plates, one frosted and one reversible black/white
- Diopter control is standard in the left viewing tube
- Coated optics for crisp image and superior resolution
- Rotating objective turret with your choice of (1x, 2x), (1x, 3x), or (2x, 4x) objectives
- Diagonally adjustable top light creating the desired amount of light on the stage plate
- Heavy-duty rack and pinion focusing with slip clutch and tension adjustment
- Illumination and stand are great for examining opaque or translucent specimens
- CSA approved
- Comes complete with dust cover and instructions
- Limited lift-time warranty
- Shipping Information: 9" x 12" x 18" - 10lbs
