VACUUM PUMP & OIL FILTER

The freeze dryer itself requires little to no maintenance. However, all freeze dryers come with a high quality vacuum pump, which requires some maintenance, mainly adding and draining oil. There are 3 cups of oil in a vacuum pump that need to be changed regularly to keep a freeze dryer running efficiently. This is a simple process, and requires little effort.

Each freeze dryer also includes a stand-alone oil filter. The filter cleans the oil and allows you to keep reusing your oil as if it were new. Using filtered oil in each batch is a great way to save money and be more eco-friendly, while also helping your vacuum pump perform as efficiently as possible.

SPECS

Each vacuum pump has been factory tested to guarantee 25 microns (25,400 Microns = 1 Inch of Hg) or better, and listed CFM performance.

TECHNICAL SPECIFICATIONS:

- CFM: 7.2
- Motor: ¾ HP, 1725 RPM
- Voltage: Standard 115V 60Hz
- Plug: US 110V
- Intake Port: ¾ JIC flare
- Intake Port: 21 oz (680 cc)
- Dimensions: 10½" H x 16" D x 5¾" W
- Weight: 35 lbs

DIMENSIONS 10½" H x 16" D x 5¾" W
