FG-K SERIES

Fast Response for Efficient Weighing Applications

The New FG-K series combines fast response time with accurate measurement to suit any weighing application.

- 

- **Three weighing resolutions** Normal (1/3000), *High (1/6000 for 30kg and 60kg weighing capacity) and *Higher resolution (1/12000 for 60kg and 1/15000 for 30kg and 150kg weighing capacity) *non NTEP settings
- 

- **Counting function** Useful in piece counting applications with sample size of 5, 10, 20, 50 and 100 pcs for unit weight registration
- 

- **Comparator function** HI / OK / LO comparator indication and optional relay output (FG-24) for checkweighing applications
- 

- **Calibration function** Simple calibration with external mass
- 

- **Auto-power OFF function** Saves power consumption by automatically switching itself off when the scale displays zero for approx. five minutes
- 

- **Optional RS-232C and Comparator Output** Easy to connect peripherals such as printer, comparator light and computer for weighing system applications
- **Low power supply indication** Alerts user to check AC power supply “Lb1” or batteries “Lb0”
- **Filtering function** Filtering levels of slow, normal and fast are selectable to suit environmental conditions
- **Leveling feet and bubble** Easy to adjust the level of the scale for accurate weighing
