FAX: (905) 475-1231

Traditionally differential counters have been manual “gear and lever” machines, and many lab techs are accustomed to the feel of the levered keys. LW Scientific offers both 5-key and 8-key manual counters for those traditional techs to count Baso, Eosin, Myelo, Juven, Stab, Seg, Lymph, and Mono cells. These counters feature pictures and names of each cell for easier identification. The LW Scientific manual counters are economical, durable, and will provide years of use...even in the most demanding laboratory settings.

## SPECIFICATIONS

Easy to read numbers  
Right and left reset knobs  
Non-slip bottom  
Strip chart of mature and immature forms  
Acid-resistant, high-impact plastic body  
Lightweight and portable  
Small footprint on lab bench

## FEATURES

Durability provides for years of service  
Bell alarm notifies of 100th cell counted
